**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 June 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 17 and 18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 17-18 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments with respect to claims 17-18 have been considered but are moot in view of the new ground(s) of rejection.

(a) Applicant argues that the prior art does not teach the new limitations.

The Examiner has introduced Barnett (6369840) to teach the new limitations.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Proehl (6532589) in view of Barnett (6369840).

As for claims 17 and 18, Proehl discloses a schedule apparatus, comprising:

Means (RAM 51) for receiving electronic program guide information (col. 4, lines 14-18);

means for creating a calendar (TV Planner - Fig. 9) including a plurality of dates and displaying the created calendar on a display device (col. 7, lines 30-35);

first means for determining whether a date from said calendar has been selected (User selects July 17 (914 - Fig. 9); col. 8, lines 25-30);

means for creating a selected date display (Fig. 10) and displaying the created selected date display on the display device, and second means for determining whether a request (1008 – fig. 10) for the EPG information has been made while the selected date display is being displayed on the display device (Referring to Fig. 10, the user at the moment is viewing the day planner for the date of July 17. On the right hand panel, the user can select to view the epg by selecting the "go to guide" button 1008; col. 8, lines 30-60);

means for creating an EPG display for the selected date and displaying the created EPG display on the display device, responsive to a determination from the second determining means that the request for the EPG information has been made while the selected date display is being displayed on the display device (col. 8, lines 30-60);

third means for determining whether a request for a viewing or recording reservation of a desired program or programs has been made while the EPG display is being displayed on the display device (From the epg, the user can select to record or to set a reminder of a program or programs; Col. 8, lines 13-22);

fourth means, responsive to a determination from the first determining means that the date has been selected, for accepting an input of user schedule information in which a user is able to edit a personal event or events of the selected day, and responsive to determinations from the first and second determining means, respectively, that the date has been selected and that the request for the EPG information has been made while the selected date display is being displayed, causing said EPG information which comprises at least program guide information of the selected date to be displayed on

the EPG display (From the day planner, the user can select to view the epg. When the user selects the epg, programming is displayed starting from the date displayed in the day planner; col. 8, lines 47-60), and responsive to the determination from the third determining means that the request for the viewing or program reservation of the desired program or programs has been made while the EPG display for the selected date is being displayed on the display screen, for accepting a viewing or recording reservation schedule for a desired program or programs (Proehl teaches that the user can select to record or set a reminder for programming from the epg; col. 6, line 61-col. 7, line 16); and

means for controlling display of the schedule information of the user's personal event or events and schedule information of the program or programs to be viewed or recorded on said calendar (Fig. 9; col. 8, lines 10-30, col. 6, lines 15-21).

However, Proehl fails to disclose:

The personal event or events comprising events unrelated to the request for the EPG information, and

The text of the schedule information of the program or programs being displayed on the calendar.

In an analogous art, Barnett discloses:

The personal event or events comprising events unrelated to the request for the EPG information (user generated event entries—Lunch with Rebecca, & weekly 1-1 w/James/weekly status meeting; fig. 12-13; col. 2, lines 25-48, col. 13, lines 39-47), and

The text of the schedule information of the program or programs being displayed on the calendar (Referring to Fig. 12, the text of a broadcast event on the 21<sup>st</sup> includes "Berkeley vs. Stanford" and "12:30pm"; col. 2, lines 25-48, col. 13, lines 39-47).

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Proehl's invention to include the abovementioned limitations, as taught by Barnett, for the advantage of allowing more flexibility in the way events can be imported and viewed and for providing a detailed personal calendar.
